Hi guys!

I suppose that You've already know something about me,so I am going to sum up everything about me as a personality. I've decided that the best way to do it is looking through my photos.

I have many hobbies and interests, because I like to try my hand at different spheres.

■ *Dancing*

I like this kind of activity since childhood, I have sense of rhythm and good plasticity.

- *Playing the piano*

My father plays the piano, that's why he wanted me to play this musical instrument too.

I believe that this hobby will be useful for me in future.

- *Cooking*

I admire of the cooking process and I do it really well.

Photography

I am fond of
taking
aesthetical
photos and
sharing them
in social
networks.

- I'm fond of *travelling and exploring new places*

- I can sum up myself as ***KIND, ARTISTIC, CURIOUS, OUTGOING, SINCERE, VERSATILE, BROAD-MINDED and HARD-WORKING.***
- As for me, all these character traits are important and helpful in making successful career and true relationships in future.

Conclusion

I'm a graduate this year and I understand how important it's to know oneself and to live in harmony with oneself. My classmates and me will turn this page of life (school) and go into new community.

That's why we should know how to introduce our personalities to unknown people.

As it seems to me, it is the main goal (idea) of this project.

So who I am?

I'm a teen with different wishes and dreams, who is trying to become a best version of oneself and expects something great from own life.

I'm really excited by the fact how fast time flew, 11 years of school are behind our backs and after graduation everyone will go in different directions to built happy life.

Personally I choose ART way.

Thanks for your attention!!!
